SERVICE STATISTICS

•*Delays in Patent Products* — As a result of the increased production by the Examining Corps, far more patents are being printed in each issue than planned. Whereas issue sizes normally contain 1800 patents, they currently contain about 2200. This increase temporarily exceeded the capacity of the PTO's contractor who captures the data and creates the tapes for the printing process. In response to the increased workload, the contractor has opened a third plant, and has employed a sub-contractor as a fourth plant.

The Official Gazette is expected to be back on schedule in August, with patent copies being on schedule by November. In the meantime, beginning with the June 6 issue, a copy of the preliminary proof of the patent section of the Official Gazette, which contains the patent text will be made available in the Patent Search Room on issue date. Also, copies of the preliminary proofs of the patents in the issue, along with the associated drawings, will be made available in patent number order in the Patent Search Room on issue date.

• *Assignment Backlog Update* — During this reporting period, over 12,000 assignment documents were mailed. During the past 2 months, over 24,000 documents were mailed.

Assignment Branch Conveyance Examiners are now reviewing documents received during March 1989.

IMPROVEMENTS TO SERVICE

• *Introduction of Mail Metering for Copy Fulfillment* — Over the past several months we have been making a gradual change in our methods of mailing U.S. patent and trademark copy orders. Previously, the PTO sent small packages via first class United

States Postal Service (USPS) and all other packages via fourth class USPS. While these methods saved the Office postage costs, many orders reached their destination slowly.

Late in the calendar year 1988 we began metering mail, starting with domestic copy fulfillment mail. Recently, we also began metering international copy fulfillment mail, and we are now metering all outgoing copy orders with the exception of Electronic Ordering Service specials, which are delivered by an overnight carrier.

With metered mail, domestic copy orders weighing up to 12 ounces, and all copy orders addressed to a USPS Post Office Box (regardless of weight) are sent first class via the USPS. All other domestic copy orders are sent via United Parcel Service (UPS). International mail is sent via USPS or UPS, whichever offers the lowest rate. With these methods of delivery, copy orders should arrive much more quickly than before.

HELPFUL HINTS

• *Use of "BOX ASSIGNMENTS"* — To ensure proper routing of patent and trademark assignments other than those filed with new patent applications, please place assignment documents in a separate envelope addressed "BOX ASSIGNMENTS" and use the words "BOX ASSIGNMENTS" on associated transmittal letters. BOX ASSIGNMENTS cannot be used for assignments filed with new patent applications because these assignments remain with the patent applications until bibliographic data is key entered and the filing receipts are mailed.

Reference Collection of U.S. Patents Available for Public Use in Patent Depository Libraries

The following libraries, designated as Patent Depository Libraries (PDLs), receive current issues of U.S. Patents and maintain collections of earlier-issued patents. The scope of these collections varies from library to libary, ranging from patents of only recent years to all or most of the patents issued since 1790.

These patent collections, which are organized in patent number sequence, are available for use by the public free of charge. Each of the PDLs, in addition, offers supplemental reference publications of the U.S. Patent Classification System, including the *Manual of Classification, Index to the U.S. Patent Classification, Classification Definitions*, and provides technical staff assistance in their use to aid the public, in gaining effctive access to information contained in patents. CASSIS (Classification And Search Support Information System); which provides direct, on-line access to Patent and Trademark Office data, is available at all PDLs. Facilities for making paper copies of patents from either microfilm or paper collections are generally provided for a fee.

Since there are variations in the scope of patent collections among the PDLs and in their hours of service to the public, anyone contemplating use of the patents at a particular library is urged to contact that library, in advance, about its collection and hours in order to avert possible inconvenience.

SECTION 1.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).

SECTION 2.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).

SECTION 2.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).
